A secure, cost effective Quality and Compliance Management system, providing a central repository for Quality and Compliance critical data.

The System includes the following modules:

- **Home**, allows users to see all activities in the system that they are responsible for
- **Monitor**, report manager showing users current status of Audits, Documents, Issues and Risks
- **Projects**, single repository for the Management of Documents, Hardware, Software & Meetings
- **Changes**, Change Control Management following best practise process
- **Issues**, effective tracking and analysis of Issues, along with appropriate action to be taken
- **Quality**, including CAPA Manager, Customer Complaints, Deviations & Risks
- **Audits**, internal & external Audit Management
- **Training**, compliant maintenance of training records
- **cGARD**, integrated with a regulatory database containing over 22,500 records of regulations and guidance

The System Prevents

- Uncontrolled paper chases
- Inefficient CAPA
- Inefficient Deviations
- Inefficient Customer Complaints
- 3-4 week preparation of Audits & Inspections
- Having to search for regulations
- Non compliant training records

Return on Investment

- Saves on average 15% to 20% on the completion of each project
- Enable management to make key decisions on real time critical information
- On average the system helps companies save between £30,000 to £50,000 per annum
- Fast to implement and validated using GAMP®5 and fully compliant with US 21 CFR Part 11
- No more uncontrolled spreadsheets, word documents and in-house bespoke systems
