

# ComplianceControl Corporate cGARD

Home Monitor Projects Changes Issues Quality Audits Training **cGARD** Help

ComplianceControl cGARD (current Global Automated Regulatory Database) contains over 22,500 records of regulations and guidance from, US, EU/EC, Canada, Japan, International, UK, China, Poland, along with over 600 additional related, regulatory and guidance documents.

The database allows full search of precise up-to-date, categorised regulatory information, draft regulations, FDA guidance, FDA Warning Letter searching, along with industry news.

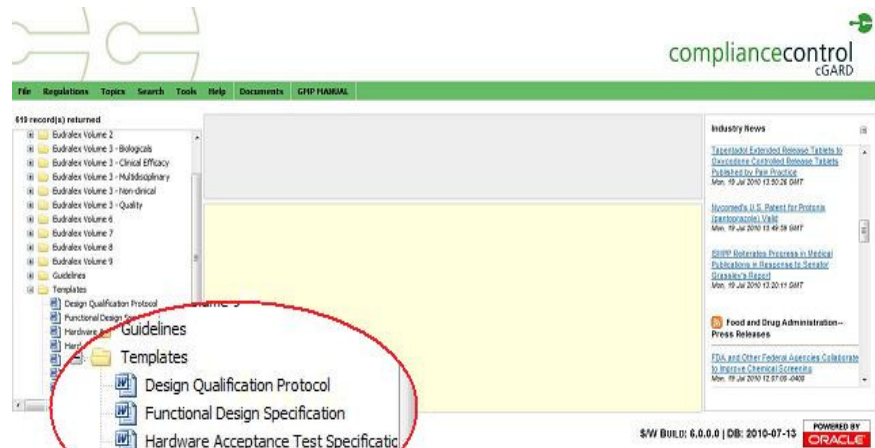

**Corporate cGARD** allows users to add any company related documentation, using drag and drop technology, to a client specific folder structure, such as Quality Manuals, Standard Operating Procedures, Protocols, company templates along with any standards, that you may have already purchased that are subject to copyright law, eg. ISO, etc.

The inclusion of all this data and information provides a Single Central Repository for all your Quality, Compliance, Regulations and other Standards; all fully searchable.
